**FOR IMMEDIATE RELEASE**

**The Envirogen Group Expands Global Operation with new offices in Amsterdam, Dubai and Bahrain**

**Derby, UK, March 2017, Envirogen Group**, the global provider of total water solutions to industries around the world, today announces the opening of new offices in Amsterdam, Dubai and Bahrain as part of its continued expansion and following an increase in new business opportunities across Central Europe and the Middle East.

Envirogen are a total solution provider of water treatment, process filtration, recycling and wastewater treatment technologies across the world, to markets that include; food and beverage, industrial, oil and gas, chemical and refining, and pharmaceutical. Envirogen prides itself on offering customers an end to end solution with systems consumables and service to cover all facets of the manufacturing process.

These new locations will enable Envirogen to take advantage of ongoing opportunities and provide a closer base for key customers in this region.

Vince Payne, Group CEO Europe, says: “This is an exciting time for Envirogen, these three new locations are pivotal to our ongoing success. We have identified substantial strategic opportunities to take our solutions into these geographies. All locations have manufacturing facilities and highly experienced teams, with significant water treatment expertise”
