

ECORANGE

ECOPURE ADVANCED DEMINERALISATION PLANT FOR ULTRA-PURE WATER

DATA SHEET

The EcoPure Short cycle ion exchange process will typically produce a treated water quality of less than 1μ S cm and less than 0.1μ S/cm conductivity with the cation polisher option. With a regeneration time of 30 minutes the EcoPure uses up to 30% fewer chemicals and 30% less energy usage than traditional systems.

The Eco-pure employs an intelligent monitoring system which continually evaluates the incoming feed water and if required, adjusts its internal capacity to respond to any fluctuations in Total Dissolved Solids. This ensures that it optimises the production of high purity demineralised water, thus reducing chemical usage and effluent production.

The EcoPure includes single bed regeneration option which can be supervisor initiated to facilitate commissioning and breakdown situations. Data logging of process data can be readily exported to an external monitoring system to provide a record of system performance.

FEATURES AND BENEFITS

- Pre-packaged, skid-mounted system minimises installation, commissioning and start-up time
- Compact design with high output flow, provides a considerable reduction in space requirement when compared to conventional deionisation systems
- Counter-flow regeneration ensures high chemical efficiency thus reducing operating costs
- Very low conductivity streams, as low as 0.1µS and less than 20ppb silica
- Single pump for service, regeneration and recycle, simplifies operation which reduces both cost and space
- Fully automatic operation requiring minimal operator involvement

- PLC & HMI control system ensures sophisticated monitoring with operational status indication
- 30% reduction in chemical use compared to traditional demineralisation plants
- 30% reduction in water use for regeneration cycles
- Significant energy savings
- Maximum productivity through automated monitoring
- Automatic and manual regeneration options
- Service friendly design
- Nationwide network of after sales service and support ensures that your water systems are maintained in optimal operational condition efficiency thus reducing operating costs

PERFORMANCE

Range/Model	EcoPure 10/10C	EcoPure 15	EcoPure 20	EcoPure 30	EcoPure 40	EcoPure 60	
Typical Treated Water Quality*	Standard EcoPure \approx 1 µS/cm / EcoPure C \approx 0.2 µS/cm						
Maximum Service Flow (m³/h)	12.0	20.0	30.0	35.0	45.0	60.0	
Minimum Service Flow (m ³ /h)	5.0	10.0	12.5	15.0	20.0	30.0	
Capacity @100 ppm total anions as CaCO₃	60.8	112.0	160.0	240.0	304.0	408.0	
Regeneration Time	≈ 30 Minutes						
HCI per Regen - 32%	18.9	32.3	57.0	81.0	105.0	137.0	
NaOH per Regen - 32%	17.6	32.4	46.3	69.5	88.0	118.1	
Maximum Effluent Flow (m³/h)	7.2	12.3	19.9	29.1	39.3	50.9	
Effluent Volume (m³)	1.147	2.048	3.180	4.686	6.000	7.952	
Effluent pH when bulked	6-9	6-9	6-9	6-9	6-9	6-9	

* Stated Treated Water Qualities & Capacity are subject to confirmation upon review of detailed water analyses

PLANT DIMENSIONS

Range/Model	EcoPure 10/10C	EcoPure 15	EcoPure 20	EcoPure 30	EcoPure 40	EcoPure 60	
Overall Height (mm)	2,300	2,600	2,800	2,660	2,900	2,900	
Depth (mm)	1,020	1,100	1,290	1,730	1,800	2,000	
Width (mm)	2,020	2,200	2,360	3,090	3,500	4,000	
Minimum Headroom (mm)	1,000	1,000	1,000	1,000	1,000	1,000	
Inlet Pipework Size (DN)	63	90	110	110	110	140	
Outlet Pipework Size (DN)	50	63	75	90	110	125	
Plant Arrangement	Fully Skid Mounted			Free Standing			

UTILITY REQUIREMENTS

Range/Model	EcoPure 10/10C	EcoPure 15	EcoPure 20	EcoPure 30	EcoPure 40	EcoPure 60	
Electrical Supply	400 Volts, 3-Phase with Neutral & Earth						
Maximum Power (kW)	3.0	5.5	7.5	11.0	16.0	18.5	
Pneumatic Supply	Instrument quality (oil & water free) at 5.5 - 6.0 Bar at 5 lpm for intermittent valve operation						
	< 1 ppm Suspended Solids & < 1 NTU; Fe < 0.2 ppm; Mn < 0.1 ppm; Silica < 5 g/l SBA; TOC < 1.25 g/L SBA; Free Chlorine < 0.2ppm; Oils, Greases, Polyelectrolytes and Detergents < 1ppb. Other feedwater						
Feed Water	limitations may apply in specific treated water applications or requirements.						
	Envirogen Group sales & technical staff can provide further details upon request.						

ABOUT ENVIROGEN

Envirogen is a leading international provider of water and wastewater treatment solutions. We solve complex challenges relating to water availability and quality, and help our customers to increase productivity, reduce costs and meet environmental and sustainability targets.

We do this through offering:

- Best in class water and wastewater treatment and process filtration technology
- Expertise in design, project management and engineering
- World class manufacturing and servicing capability

UK HEADQUARTERS

Envirogen Group Unit 9, Wimsey Way, Alfreton Trading Estate Alfreton, Derbyshire, DE55 4LS T: +44 (0) 1773 441029 E: enquiries@envirogengroup.com

EUROPEAN HEADQUARTERS

Envirogen Technologies bv Penningweg 71, 1507 DG Zaandam, The Netherlands T: +31 75 204 7200 E: NLinfo@envirogengroup.com

NORTH AMERICAN HEADQUARTERS

Envirogen Technologies 2627 Chestnut Ridge Road, Suite 200 Kingwood, TX 7733 T: 713.979.9142 E: info@envirogen.com

We have a network of regional sales and service teams worldwide: **UK and Europe:** UK, The Netherlands, Germany, France, Italy.

USA: Texas, Tennessee, New Jersey, California, Nevada.
